

Looking for Insights from Health and Human Services Providers

Please help us by responding to this short poll by August 7th

There are people who have a hard time accessing the health and human services available to them because they don't have reliable travel options. If people can't drive – or can't afford to drive – it can be difficult for them to get where they need to be. This can have a bad effect on health outcomes. We're trying to understand how big a problem this is so we can respond with travel options that work in our rural county. That's why we're asking for your help, please.

We need to tap your experience. Caregivers in the health and human services sector interact daily with people from every walk of life and demographic group. No group understands better the overall effects that lack of reliable travel has on our region.

Please complete this short poll. Help us increase our understanding of the impacts on health outcomes when people can't access the care and services available to them *because they can't get there*. Use the QR code or copy this link into your browser: <https://www.surveymonkey.com/r/HSTPprovider>

Your input will help open doors to relevant grants available right now with potential to improve travel options for the people who need it most in Okanogan County.

Thank you for your time and assistance!
